

## Program Objectives

### **1. Access to quality computers and internet service.**

Project Connect will provide the community with access to computers and internet at our on-site computer lab.

**2. Increase computer/technology literacy.** Project Connect will increase computer/technology literacy by providing basic computer/technology training to the community. Hands on training will be delivered via a small class design to give participants ample time to learn the material and practice using it.

**3. Individual Assistance.** Project Connect will provide individual assistance to individuals who need help learning how to operate new devices or who need just a little more help filling in gaps after taking a computer/technology course.

**4. Resources.** Project Connect will provide resources in two distinct ways: 1) Project Connect will connect individuals to resources within the community, as needed and requested and 2) Project Connect will connect individuals to resources that provide discounted or free computer, internet or other technology services or products.

## OUR MISSION

Our mission is to assist individuals with developing skills necessary for effective digital engagement, through strategic initiatives that promote equitable, adequate and affordable access to technology and increases digital literacy.

## OUR VISION

We envision a world where everyone has equitable access to adequate and affordable technology and the necessary skills to utilize it most effectively.
